CASE STUDY – I & II

Name: Mohamed Hannan N

Register Number: 24BCA0001

Course Code: UCSC315L

Course Name: Human Computer Interaction

Slot: A1 + TA1 + TAA1

Faculty Name: Dr. Mohanraj G

Question with key:

Q.No.	Question	Max Marks	CO	BL
1.	Chose any one real time Mobile application or API and do the following activities: • Identify the potential stakeholders of the application. • Write the description about the app and include the screen shots of application. • Mention the role of the stakeholders in the application. • Mention the interaction styles for the stakeholders. • Upload the video taken during survey in drive and past the drive link in document. • Upload the survey or feedback taken from stakeholders (it should contain detail report about survey being taken)	10	CO1	BL4

APPLICATION CHOSEN:

WHERE IS MY TRAIN

Where Is My Train is a mobile application used by railway passengers to track live train running status. The app provides real-time train location, arrival and departure timings, platform numbers, delay updates, and train schedules. It works even with low internet connectivity and is widely used across India by daily commuters and long-distance travelers.

Where is my Train

Sigmoid Labs and its affiliates

IDENTIFY THE POTENTIAL STAKEHOLDERS

The **key stakeholders** of the Where Is My Train application include:

- **Passengers:**

Users who track train status and plan journeys

- **Indian Railways Authorities:**

Provide official train data

- **Train Staff:**

Support operational updates

- **App Developers:**

Design, maintain, and update the application

- **Data Providers:**

Supply GPS and backend railway data

ROLE OF THE STAKEHOLDERS

Stakeholder	Role
Passengers	Check live status, delays, and platform info
Railway Authorities	Provide schedule and operational data
Train Staff	Enable real-time movement updates
Developers	Maintain UI/UX and system performance
Data Providers	Ensure accurate location tracking

SCREENSHOTS

INTERACTION STYLES FOR STAKEHOLDERS

1. Passengers (End Users)

- **Primary Interface:** Mobile application
- **Interaction Style:**
 - Touch-based interaction
 - Menu-driven navigation
 - Search-based input for train number/name
 - Real-time visual feedback (maps, status updates)

2. Train Staff

- **Primary Interface:** Railway operational systems (backend tools)
- **Interaction Style:**
 - System-based interaction
 - Automatic data updates through onboard systems
 - Minimal direct user interaction
 - Monitoring train movement and operational status

3. Indian Railways Authorities

- **Primary Interface:** Centralized railway management systems
- **Interaction Style:**
 - Dashboard-based interaction
 - Data entry and monitoring
 - Report generation and system control

4. App Developers

- **Primary Interface:** Development and monitoring tools
- **Interaction Style:**
 - Analytical interaction with logs and metrics
 - Debugging and performance monitoring
 - UI/UX improvement based on user feedback

5. Data Providers

- **Primary Interface:** GPS systems and backend servers
- **Interaction Style:**

- **Machine-to-machine interaction**
- Automated data transmission
- Real-time synchronization with railway databases
- No direct human interaction

SURVEY REPORT

A user survey was conducted using **Google Forms** to analyze the usability and user experience of the application. The survey focused on ease of use, accuracy of information, interface design, and overall satisfaction.

The screenshot shows the top portion of a Google Form. The title bar at the top reads "WHERE IS MY TRAIN – USER EXPERIENCE SURVEY (HCI Case Study)". Below the title bar, there are tabs for "Questions", "Responses" (with a count of 61), and "Settings". The main content area features a logo for "Where is my Train" by "Sigmoid Labs and its affiliates". Below the logo, the survey title "WHERE IS MY TRAIN – USER EXPERIENCE SURVEY (HCI Case Study)" is repeated. A paragraph of text explains the survey's purpose: "Hi, I am a BCA student conducting this survey as part of my Human Computer Interaction (HCI) case study. This survey aims to understand the user experience, usability, and interaction design of the Where Is My Train live train tracking application. The feedback collected will help analyze user satisfaction and identify areas for improving the app's UI/UX. All responses will be used only for academic purposes." Below this text is a text input field labeled "Name *".

This screenshot shows the lower portion of the Google Form, displaying four input fields. The first field is "Name *" with a "Short answer text" label. The second field is "Email ID *" with a "Short answer text" label. The third field is "Age Group *" with four radio button options: "Below 18", "18-25", "26-40", and "Above 40". The fourth field is "Gender *" with a radio button option for "Male". The form's title bar and tabs remain visible at the top.

Show's train location after few minutes of departure

NIL

Yes I faced a usability issue. The application does not provide an accurate or proper GPS-based live tracking system for local trains. Sometimes the train location is not updated correctly or is unavailable, which makes it difficult to track local trains in real time. Adding a more reliable GPS tracker specifically for local trains would improve the user experience.

Sometimes local trains live track is not updating

Nope

I am in train feature doesn't work properly.

One problem I faced that is showing 4 km away from station but actually train has arrived in platform and something km and timings differ for daily travelling need to accurate that is my suggestion thank you very much

Did you face any usability issues or UI-related problems while using the application? If yes, please mention them.

Facing real time delay

Sometimes the app takes time to load train details when the internet connection is weak.

Everything thing is good, but app should work well in low internet connectivity.

Yes! The local train live tracking data is not updated quickly.

Nothing

Sometimes no proper location

Yes—sometimes the interface feels cluttered, and a few features are hard to find due to unclear icons and too many options on one screen.

The user enters the train number, selects the source, destination and date, then taps on Search.

The user enters the train number, selects the source, destination, and date, then taps on Search.

The app shows the live running status, current location on map, next station, and estimated arrival time.

The app displays the platform number, departure and arrival time, live status, and lets the user view the route on map.

The app sends real-time alerts for delays, platform changes, next station updates and important service notifications.

The user saves the journey to get real-time updates and reminders making travel more convenient and stress-free.

Persona:

Persona: Where is my Train User

Rahul Sharma

Age: 28

Occupation: Software Engineer

Location: Bengaluru, India

Experience: 4+ years

Frequency of Use: Daily

Goals

- Check live train status instantly
- Track train location in real-time
- Know accurate arrival/departure times
- Plan journeys better
- Get platform information easily

Pain Points

- Sometimes train updates are delayed
- Too many ads can be distracting
- Hard to find info in crowded apps
- Internet issue while traveling

About

Rahul travels by train frequently for work and family visits. He relies on Where is my Train to check live train status, PNR updates, platform info, and delays. He wants quick, accurate, and easy-to-understand information so he can plan better.

Behaviors

- Searches trains by number or name
- Checks PNR status regularly
- Uses live station & platform updates
- Trusts the app for real-time updates
- Uses the app multiple times a day

Tech Profile

- 📱 Android Phone (Mid-range)
- 📶 Uses Mobile Data & Wi-Fi
- 📲 Comfortable with Apps
- ★ Keeps favorite trains saved

Needs

- Accurate and real-time updates
- Simple and clutter-free interface
- Fast search and easy navigation
- Offline access to saved trips
- Timely alerts for delays or platform changes

Favorite Features

- 📍 Live Train Status
- 📄 PNR Status
- 🔔 Platform Info & Alerts
- ❤️ Saved Trips

“ When I travel, this app is my go-to.
I just want the right info, right when I need it. ”

THANK YOU
